You are cordially invited to sponsor or exhibit at the 3rd Annual Billington Cybersecurity Summit in Washington, D.C. on September 27, 2012.

Featuring top cybersecurity experts from the NSA, CIA, DOD, DHS, White House, NERC, NIST, ODNI and industry, this conference has been a sell out the first two years; and 70% of attendees at the last summit were at the Director Level or above. The event is produced by an independent media company Billington Cybersecurity.

Critical infrastructure risks are growing. Our power systems, grid, security systems, financial systems, governmental systems and military networks are all at risk. Federal contractors are rushing to provide solutions to the critical threats faced by industry and government at the Federal, state and local levels. The 3rd Annual Cybersecurity Summit will address the critical risks and the resulting opportunities posed by the increasing interconnectedness between critical infrastructure and the Internet and cyberspace. This is your must attend event for a serious discussion of this sensitive area of national security.

5 Benefits
Of Sponsoring Or Exhibiting:

1. Network with high-level government, industry and military decision makers in a “high touch” intimate environment
2. Position your business as a thought leader in the hot cybersecurity area through branding on event promotions, chair drops, speaker introductions, and advertising—all in one package
3. Receive qualified leads both onsite and by email that you can use to generate new business opportunities, including one-time use of the entire attendee mailing list
4. Free guest passes for your team, key clients and potential clients to maximize onsite networking
5. Be on the ground floor of the cybersecurity field, the new 5th domain to be added to land, sea, air and space, and the latest developments in cloud security, mobile wireless security, etc

“The Billington CyberSecurity Summit in Washington DC included some of the foremost security experts and thought leaders in federal IT.”
